PATENT
Filed: April 23, 2001

1. (currently amended) An electronic program guide for use in conjunction with an interactive television, comprising:

at least one television channel listing;

at least one Web site channel listing, each web site channel listing correlated to its own dedicated virtual channel number; and

an information panel, the information panel displaying information relevant to a channel on the program guide, the electronic program guide including content from at least one Web server and at least one television signal source, wherein a user can choose a channel by scrolling to the channel and toggling a selector element, information about content on each channel being displayed in the information panel as the user scrolls across each respective channel.

2. (currently amended) An interactive television, comprising:

an electronic program guide displayed by the interactive television, the electronic program guide having:

at least one television channel listing; and

at least one Web site channel listing, each web site channel listing correlated to its own dedicated virtual channel number, wherein a user can choose a channel by scrolling to the channel and toggling a selector element, information about content on each channel being displayed in an information panel of the guide as the user scrolls across each respective channel.
